demonstrations

Cultivating Hope Through Collaboration

The Brain Injury Alliance of NKY will be hosting the 2023 annual conference, specifically designed for healthcare professionals, brain and stroke injured survivors, their families and caregivers, military/veterans, educators, and students.

The 2023 NKY Brain Injury Conference will bring all Professionals under one roof to share their expertise and new ideas in the field of Brain Injury, along the theme of "Cultivating Hope Through Collaboration". This conference will offer a multi-track agenda, focusing on issues related to disorders of consciousness, adaptations, therapeutic interventions, persistent concussion syndrome, vision rehabilitation, real-life survivor challenges through interactive discussions, and more. Attendees will have the opportunity to gain new insight and resources, and the chance to collaborate with networks from all over the NKY area.

Join us to learn more about the needs of brain injury survivors and ways we can continue to support their long-term success!
